

Sean Carter

Mobile: (303) 434-2272, Email: sean.dan.carter@gmail.com, Website: <https://collisteru.github.io>
LinkedIn: [linkedin.com/in/sean-carter-software-engineer](https://www.linkedin.com/in/sean-carter-software-engineer)

Experienced, articulate developer and researcher specializing in AI research and implementation. Skilled at communicating cross-functionally within the enterprise and with clients.

Work Experience

Web Design Consultant

February 2026

- Designed the sidenote system for the blog *Philosophical Multicore* (https://mdickens.me/2024/09/26/outlive_a_critical_review/)
- Designed <https://collisteru.net> and <https://collisteru.github.io>

Consulting AI Developer/Analyst

March - June 2025

- Developed appointment calendar system for a law company
 - Summarizes Zoom meeting transcripts and next steps
 - Developed a fully autonomous AI agent based phone answering system for a dental industry call center.

AI Developer/Analyst

ToolCASE LLC, September 2023 - June 2024

Responsible for analyzing and improving Rembrandt AI system output accuracy with banking fraud transaction detection.

- Expanded model capabilities by representing transactions as images for processing by a Convolutional Neural Network (CNN).
- Created new Recurrent Neural Network (RNN) architecture for individual fraud detection.
- Performed factor analysis of mixed data for transaction data.

Machine Learning Researcher

ToolCASE LLC, June - September 2023

Responsible for two research projects to improve the Rembrandt AI financial fraud identification system.

- Trained a new Long Short Term Memory (LSTM) system to identify fraud on the basis of a time-series analysis of the past behavior of each individual banking customer.
- Used F-Score to quantify improvements from learning.
- Created new unsupervised learning techniques to better use data from non-fraudulent transactions.

Software Engineer, Allthenticate

July - September 2022

Responsible for enhancement of an enterprise wide authentication system for a cybersecurity consulting and product firm.

- Integrated SSH public keys across bluetooth connections, the desktop applications
- Upgraded an application with an internal API to retrieve user's public keys from the company database.
- Developed database queries to assign user public keys to unique emails.

Leadership and Projects

Founding Board Member

RMAIIG, January 2023 - Present

Responsible for ensuring *Rocky Mountain AI Interest Group* meetings are set up and run effectively. Coordinated schedule for meetings among the presenters and members. Resolved logistical issues in a team. Became a prominent and known AI Specialist in the Boulder/Denver AI community.

Phonopro Developer, First Place Winner

BlasterHacks, 2024

Developed the web app *PhonoPro*, which translates and trains users to learn the IPA. The project won first place at *BlasterHacks 2024*

Skills & Technologies

Programming Languages: Python, Java, SQL, C++, C, bash, LaTeX, JavaScript, TypeScript, Haskell

Machine Learning: RNNs, LSTMs, CNNs, Transformers. PyTorch, Pandas, NumPy and scikit-learn.

Frameworks: React, JSFiddle, Gatsby

Libraries: Axios, TailwindCSS, PostgreSQL, RegEx, Vue.js,

Software: Prisma, VSCode, Gimp, Krita, Inkscape

AI Platforms: OpenAI API, CrewAI, Make

Development Environments: PC, macOS, Linux, WSL, Jupyter Notebook, Netlify, Atlassian Suite

Development Methodologies: Agile, Scrum, Waterfall.

Education

University of Colorado, Boulder: Bachelor of Science in Computer Science (BSCS), with a Minor in Applied Mathematics, 2025.

Selected Coursework: Introduction to Natural Language Processing, Machine Learning, Introduction to AI, Computational Methods, Markov Methods, Mathematical Foundations of Probability Theory.
